

NGUYEN TIEN PHAT

Curriculum Vitae

Thu Duc, Ho Chi Minh City, Vietnam

nguyentienphatgl@gmail.com — +84 326 782 970 — github.com/nguyentienphat2904

Fresher Software Engineer interested in backend engineering and distributed systems. Experienced in building Spring Boot applications, RESTful APIs, and access control solutions, with additional full-stack experience using React and Next.js.

EDUCATION

Bachelor of Science in Computer Science

Ho Chi Minh City University of Technology - VNU

Faculty of Computer Science and Engineering

Graduation: June 2026

GPA: 3.5/4.0

SKILLS

Backend: Spring Boot, NestJS, RESTful API Design, Authentication & Authorization, Spring Security, Prisma ORM, Database Design **Frontend:** React, Next.js, React Native, Tailwind CSS, Redux

Databases: PostgreSQL, SQL Server, MongoDB

Blockchain: Hyperledger Fabric, Chaincode Development

DevOps & Tools: Git, Docker, Postman, Swagger, GitHub Actions

Methodologies: Agile / Scrum

Design: Figma, Canva

Languages: English – TOEIC 820

EXPERIENCE

Software Engineer Trainee

Viettel Digital Talent

May 2026 – July 2026

- Completed intensive training in software engineering, backend development, system design, cloud-native technologies, and Agile development practices.
- Designed and implemented full-stack HL7 FHIR configuration management modules, including Implementation Guides, Form Types, FHIR Resources, FHIR Keys, Mapping Configurations, and configuration versioning using NextJS, NestJS, Prisma ORM, and PostgreSQL.

Java Backend Intern

TMA Solutions

June 2025 – August 2025

- Developed and maintained RESTful APIs using Spring Boot for internal enterprise systems, supporting multiple business workflows with role-based access control.
- Integrated Open Policy Agent (OPA) to enforce dynamic, fine-grained authorization policies, allowing administrators to configure roles and permitted actions at runtime without hard-coded logic.
- Refactored legacy backend modules under senior engineer guidance, improving code readability and easing future feature maintenance.

Frontend Developer

Freelance Project – Corporate Website

February 2025 – March 2025

Live site: <https://tiendungcorp.com>

- Developed a business website using Next.js, React, and Tailwind CSS for a client.
- Implemented server-side rendering (SSR), SEO best practices, and dynamic content modules.
- Designed and implemented an admin panel for managing articles, including creation, editing, and deletion features.

Frontend Developer

Ho Chi Minh City University of Technology Digital Transformation

June 2024 – August 2024

- Developed web interfaces for student union and extracurricular activity management systems.
- Implemented responsive UI and collaborated in a 10-member SCRUM team.

PROJECTS

Capstone Project – Blockchain-based Application for Drug Traceability

Ho Chi Minh City University of Technology

January 2026 – May 2026

- Designed and developed a permissioned blockchain solution for end-to-end drug traceability across manufacturers, distributors, pharmacies, and regulators using Hyperledger Fabric.
- Implemented chaincode in Go and optimized transaction workflows to reduce MVCC conflicts and improve transaction processing efficiency.
- Designed and enforced fine-grained role-based access control by integrating Open Policy Agent policies with Hyperledger Fabric identity attributes.
- Developed RESTful backend services with Spring Boot to manage transaction submission, ledger queries, and blockchain network interactions.
- Evaluated system performance under concurrent workloads, achieving approximately 50 TPS for transaction writes and 70 TPS for ledger reads while maintaining stable network operation and acceptable latency.

Mobile Application – Clone Jira

Course Project (Team of 4)

November 2025 – December 2025

Showcase: <https://heroic-sopapillas-eee5a7.netlify.app>

- Built a mobile application replicating core Jira features such as task management and issue tracking.
- Designed UI/UX flows using Figma, following Jira Software interaction patterns.
- Developed cross-platform mobile features using React Native.
- Integrated RESTful APIs, Google Sign-In and push notifications.
- Implemented frontend testing and integrated error monitoring using Sentry.
